

EPIGENETICS

A Correction to the Research Article Titled: “Personalized Epigenomic Signatures That Are Stable Over Time and Covary with Body Mass Index” by A. P. Feinberg, R. A. Irizarry, D. Fradin, M. J. Aryee, P. Murakami, T. Aspelund, G. Eiriksdottir, T. B. Harris, L. Launer, V. Gudnason, M. D. Fallin

In Table 1 of this Research Article, the authors have replaced waist/hip ratio with waist circumference, another indicator of cardiometabolism. This change does not affect the results, as this variable was not used in any of the methylation analyses. The variable was included to provide additional information about body mass index–related phenotypes.
